

## **TxCell reports monthly information regarding the total number of voting rights and the total number of shares**

**Valbonne, France, September 1, 2016 – TxCell SA (FR0010127662 – TXCL)**, a biotechnology company developing innovative, personalized cellular immunotherapies using regulatory T cells (Treg) to treat severe chronic inflammatory and autoimmune diseases, today reports the monthly information regarding the total number of voting rights and the total number of shares.

Pursuant to the article 223-16 of the AMF General Regulation, the total number of shares comprising the share capital and the total number of voting rights as of August 31, 2016, is presented as follow:

Date	Total number of shares of the Company	Total number of voting rights	
		Total gross (1)	Total net (2)
31/08/2016	13,071,173	13,071,173	13,031,593

- (1) Pursuant to the article 223-11 of the AMF General Regulation, the total number of gross voting rights is calculated on the basis of all shares to which voting rights are attached, including shares whose voting rights have been suspended. The number of gross voting rights (or theoretical voting rights) is used as the basis for calculating the crossing of shareholding thresholds.
- (2) The total number of net voting rights (or exercisable voting rights) is calculated without taking into account the shares with suspended voting rights, in this case, shares held by the Company in the context of a liquidity agreement. It is released so as to ensure that the market is adequately informed, in accordance with the recommendation made by the AMF on July 17, 2007.

**About TxCell – [www.txcell.com](http://www.txcell.com)**

TxCell is a biotechnology company that develops platforms for innovative, personalized T cell immunotherapies for the treatment of severe chronic inflammatory and autoimmune diseases with high unmet medical need. TxCell is the only clinical-stage cellular therapy company dedicated to the science of regulatory T lymphocytes (Tregs). Tregs are a recently discovered T cell population for which anti-inflammatory properties have been demonstrated.

TxCell is developing two proprietary technology platforms, ASTrIA and ENTrIA. ASTrIA is composed of autologous antigen-specific Type 1 Tregs. Ovasave<sup>®</sup>, TxCell's lead drug-candidate originating from the ASTrIA platform, is currently in a Phase IIb clinical trial in refractory Crohn's disease patients. ENTrIA is composed of Chimeric Antigen Receptor engineered

FoxP3+ regulatory T cells (CAR-Treg). In this area, TxCell is pursuing two CAR-Treg development programs in collaboration with leading European research institutions: one targeting Lupus Nephritis with Ospedale San Raffaele in Milan and the other targeting Bullous Pemphigoid with the Lübeck Institute of Experimental Dermatology.

Based in Sophia-Antipolis, France, TxCell is listed on Euronext Paris and currently has 50 employees.
